8th May 2022

PAYMENT
Bank account payment after the registration

LEVEL OF ENGLISH LANGUAGE REQUIRED
B1

COORDINATOR
Angela Magnanini

TEACHING PERIOD
10 - 14 May 2022

LEARNING OBJECTIVES
The Season School will introduce participants to the critical topic of inclusion, sport, and autism. The season school was established by the University of Rome Foro Italico in collaboration with the Sports University of Tirana (UST), Albania, a leading educational institution in Sports Sciences in the Balkans. The interdisciplinary perspective of the school has inclusive education as its guiding thread. The aim is to offer knowledge, research perspectives, and working methodologies to address the challenge of autism in contemporary society. Sport is a valuable tool for social inclusion. Sports educators should have to know how to use sport in an intentionally educational way to support the development and autonomy of people with autism. The season school aims to provide tools and insights to raise social awareness and support the training of teachers, educators, and experts in sports, disability, and inclusion studies. Experts and scholars will address the course topics by collaborating with Associazione Filippide, an Italian non-profit association specializing in sports and autism. The interconnection between theoretical and practical principles will be evident in the constant interaction between lecturers, students, and experts.

TEACHING METHODOLOGIES
Students will find an interactive and cross-disciplinary learning environment that facilitates problem-solving, decision-making, strategic communication, and leadership. Interest in the interdisciplinary approach will characterize both the teaching staff and the participants. Innovative methodologies such as flipped classrooms and digital tools will support theoretical and practical training and face-to-face workshops.

The teaching and learning activities of the course will be delivered through digital platforms and social networks, except for the final training session, which will be held in person on a date to be announced to attendees.

WHO SHOULD ATTEND THIS SEASON SCHOOL?
The course is open to all undergraduate, postgraduate, and Ph.D. students from different backgrounds (Sports and Health Sciences, educational sciences, psychology, sociology, human sciences, and so on) interested in understanding and deepening the topics covered by the season school.

COORDINATOR AND TEACHING STAFF
Prof. Angela Magnanini (Coordinator)
Prof. Emanuele Isidori
Prof. Nicola Pintus
Dr. Lorenzo Jori
Dr. Chiara Pannone
Dr. Luca Biasillo
Dr. Fernando Battista

Angela Magnanini (Ph.D.) is an Associate Professor in Special Education and Didactics at the Department of Movement, Human Sciences and Health of University of Rome Foro Italico. She is the Director of the Specialization Course for support Teachers. She regularly lectures on Pedagogy for Special Educational Needs, and Pedagogy of integrated sport in undergraduate and graduate courses and training courses for schoolteachers in the post-degree classes. She is a tutor of the Doctorate Program in Human Movement and Sports Sciences at her University.
