OTHERS
Regular students show a good percentage of ECTS acquired at the end of the 1st year, with a slight decrease in the a.y. 2017/2018, still higher when compared to the situation at national level for the same II level programs (1). Not less than 97% of students progress towards the 2nd year of the study program, with an excellent percentage of graduates within the program duration. (2).

Gli indicatori della didattica mostrano un buon andamento delle carriere degli studenti, stabile nel tempo, con una leggera diminuzione nella % di CFU acquisiti al termine del I anno nell’a.a. 2017/2018, comunque decisamente superiore alla situazione nazionale (1), con più del 98% di studenti che prosegue al II anno e una percentuale molto elevata di studenti che si laurea entro la durata regolare del corso (2).
The percentage of regular students acquiring 2/3 of mandatory ECTS within the 1 year is satisfactory and stable in the 4-year trend (3). The percentage of students that withdraw from the program seems also lower than the national value, with a slight increase in the 2018/2019, than back to the usual trend (4).

La percentuale di studenti che acquisiscono non meno di 40 CFU entro il primo anno di corso è soddisfacente con un andamento stabile nel quadriennio. La percentuale di abbandoni è minore rispetto la media regionale e nazionale, con un leggero incremento nel 2018/2019, e un nuovo abbassamento nel 2019/2020.

### 3

% enrolled students that acquired at least 40 ECTS within the regular a.y.

The uniqueness of the LM67-I study program at national and international level is verified by its attractiveness among bachelor graduates from universities other than Foro Italico (5), with a very distinct percentage of enrolled students (about 40%) that acquired their bachelor degree abroad (6).

Ottima e stabile nel triennio l’attrattività a livello nazionale ed internazionale, con più del 60% di iscritti provenienti da un altro ateneo (5), di cui circa il 40% da atenei non Italiani (6).
The % of ECTS acquired abroad is very high, in line with the structure of the joint program, and usually higher than the mandatory amount (12.5%), reflecting the students’ interest towards international training experiences (7). The tendency to decline in the a.y. 2018/2019 could reflect the incapability of the students to attend elective activities abroad.

L’eccellenza del grado di internazionalizzazione è verificata anche dal numero medio di CFU acquisito all’estero da ogni studente, superiore del minimo obbligatorio del 12,5% (7). Il declino che si nota nell’a.a. 2018/2019 potrebbe essere dovuto all’impossibilità degli studenti di frequentare attività a scelta offerte dalle università partner.
The program satisfaction by graduating students (8) and graduates (9) shows a positive 4-year trend, higher or comparable to the regional or Italian national situation, with an excellent satisfaction towards the relationship with the teachers (92%) and with other students (100%) (Alma Laurea database).

La soddisfazione degli studenti, riferita sia ai laureandi (8) che ai laureati (9), mostra un trend positivo, generalmente migliore o in linea rispetto il panorama locale e nazionale. Particolarmente apprezzati il rapporto con i docenti (92%) e con gli altri studenti (100%) (Alma Laurea database).
EMPLOYABILITY OF EMHPA (LM67-I) GRADUATES
(Indicators from MIUR-SMA annual monitoring– update October 2021)

Despite the apparent negative trend in 2017, possibly due to the lack of data collected by Alma Laurea on non-Italian graduated, the employability (job/doctorate) of graduates after 1 (10) and 3 (11) years from the program completion is good, comparable or better than the situation at national level.

A parte il trend apparentemente negativo nel 2017, possibilmente determinato dall’assenza di dati rispetto ai laureati non-Italiani, i dati sulla situazione occupazionale (impiego/dottorato) dei laureati a 1 (10) e 3 (11) anni dalla laurea sono buoni e sovrapponibili o migliori rispetto la situazione nazionale.
